

Infection Prevention and Control

Sound knowledge of infection prevention and control promotes better health. This course provides an understanding on how to control and prevent infections. Why is this important?

Every year at least 300,000 people develop health care associated infections. This has a significant impact on the health of the patient, staff and people who come in contact with any person vulnerable to infections.

- Accredited by CPD (Continued Professional Development)
- Fully online course and assessment with no time constraints
- Full audio voiceover and high quality download
- Approximate duration: 60 minutes
- Accredited system generated certificate received on successful completion

Course content – 7 short modules covering:

- Module 1: The course structure
