Stroke Awareness

Course Description

Stroke is the fourth single leading cause of death and disability in the UK.

Awareness of the cause and symptoms of Stroke will assist with prompt action where someone is suspected of having a stroke. The prompt action offers the casualty with the best chance of receiving the treatment to minimise the long term impact of the condition. This course covers the types of strokes, symptoms, risk factors, treatment options and the longer-term impact of Stroke.

Target Audience

This course is aimed primarily at people working in the adult care sector or anyone caring for someone at a high risk of stroke.

Benefits

Online training is flexible, efficient and cost-effective. The candidate can complete the modules at their own time offering the benefit of completing the course around their commitments.

Further Progression

We offer an extensive portfolio of courses in our health and social care suite that are a great addition to this course. Anyone employed in the care sector would benefit from our CPD accredited [Epilepsy Awareness](#), [Diabetes Awareness](#), or [Dementia Awareness](#) courses.

View other complementary [Health and Social Care](#) courses.
