

## Working Safely

Working safely is in the interest and concern of all staff – both the employers and employees. There are three reasons for managing risk at work that bring benefit for all concerned – moral; not causing harm to work colleagues, legislative; the law requires it! – And finally financial; all accidents bear a cost to both parties. The reality is too many workers are injured by not observing Health and Safety laws. Our online training covers the importance of working safely, defines and identifies hazard and risk, improving safety performance and protecting the environment.
