

Working at Height

This course is aimed at employers and anyone who regularly undertakes work at height. The term work at height applies to a wide range of situations ranging from working on platforms, ladders, scaffolds, working alongside deep trenches, including materials or equipment falling from heights, equally present a dangerous hazard. The Work at Height Regulations 2005, confer legal duties on employers and employees to assess, control and minimise risks and hazards from work at height. This course covers topics including the dangers of working at height, the regulations, the hierarchy of controls, and assessing risk.
